
KATHY GRANT-MURPHY NEEDS A KIDNEY

Kathy Grant-Murphy desperately needs a new kidney. After 55 years of suffering with Type I diabetes, her kidneys are no longer functioning. Her family members are not a match.

Donating a kidney is **easy**, completely **cost-free** and **donors can live a perfectly healthy life with only one kidney.**

A potential donor for Kathy has to be over 18, type O blood type and complete a health survey.

Contact Michael Grant to help.
